Target version:			

Description

This will add a new button to the main dialog (the 'play-settings-high scores-about' one) with alink to a 3x3x3 Solver.
Once there, a user will be able to set up a position (by first selecting one of the 6 face colors and then touching a cubit face to paint it with this color) and click a button which will present the user with a scrollbar showing the whole solution.
